# PAJAR

## SOFTWARE ENGINEER

Bogor, West Java | pajarr2302@gmail.com | 089616164757 | LinkedIn | Portfolio

*Open to on-site (WFO) placement in Jabodetabek*

## ABOUT ME

Software Engineer with 3+ years of experience building and maintaining enterprise web applications for retail, ERP, logistics, HRIS, and government systems. Fullstack across Laravel, Node.js, React.js, Next.js, and Vue.js, with strong focus on query performance, clean and maintainable code, and live-system troubleshooting. Experienced in turning slow or error-prone workflows into reliable features, working closely with business users and cross-functional teams.

## PROFESSIONAL EXPERIENCE

### Alturian | Jun 2024 - Present

**Software Engineer Specialist** Apr 2026 - Present

*Stack: Laravel, PHP, Vue.js, Angular, WebSocket, Sentry, Git*

- Own complex issues and enhancements across E-Commerce, ERP, Merchandising, and HRIS systems, with primary ownership of E-Commerce.
- Resolved and enhanced 29 E-Commerce issues within 5 working days, covering complex ordering flows and improving production readiness ahead of schedule.
- Contribute to major retail projects serving operations in Japan, Myanmar, and Indonesia.
- Automate manual operational processes to improve efficiency across business workflows.
- Analyze complex business and technical cases, recommend implementation approaches, and mentor junior developers on code quality and safer solutions.
- Provide debugging and troubleshooting support for live systems in collaboration with business users.

**Software Engineer** Apr 2025 - Mar 2026

- Primary developer for 8 major modules and support for 2 more across Invoicing, Supplier Deposit, Supplier Loan, and ERP systems.
- Optimized a report query over approximately 24 million invoice-item records, reducing execution time from about 192 seconds to 8-12 seconds.
- Refactored existing modules for readability and maintainability, so other developers can continue and extend them faster.
- Introduced safer coding practices for model relationships and data access, preventing runtime errors when related data is missing.
- Moved heavy export operations to asynchronous Laravel Jobs, keeping the application responsive during long-running processes.

**Junior Software Engineer** Jun 2024 - Mar 2025

- Maintained and enhanced an ordering system used by approximately 400-500 users with Laravel, Angular, and Vue.js.
- Replaced long polling with WebSocket-based communication in Live Chat and Call features for more efficient real-time interaction.
- Investigated and resolved HTTP 500 errors, application errors, and business-logic issues across ordering workflows.
- Improved reliability with safer try-catch error handling and Sentry for error tracking and monitoring.
- Delivered bug fixes and feature requests on a regular basis, supporting continuous improvement of the ordering platform.
- Employee of the Month: August 2024 and January 2025.

### PT Zamasco Mitra Solusindo | Fullstack Developer | Jun 2023 - May 2024

*Stack: Laravel, PHP, Redis, REST API, SQL*

- Primary developer of a Warehouse Management System (WMS) supporting nationwide logistics operations for BNPB, covering courier management, item scanning, shipment tracking, inventory, and stock replenishment.
- Optimized database queries and data upload processes for nationwide inventory data and high-volume concurrent uploads from Ministry users.
- Integrated REST/JSON APIs with BNPB monitoring systems to provide equipment monitoring dashboards.
- Built a disease reporting information system for the Ministry of Health (dengue fever and helminthiasis) with dashboards, reporting workflows, and offline data entry, processing about 15,000 reports per month.
- Strengthened application security after identifying SQL injection risks, by improving validation and data handling across the codebase.
- Deployed applications to servers and maintained infrastructure using Redis and server-side configuration.
- Co-developed a real-time vote-recording application for a political organization using Laravel, with secure storage and real-time processing of voting data.

**PT Immobi Solusi Prima** | Backend Developer (Internship) | Jul 2022 - Jan 2023

*Stack: Node.js, AdonisJS, Express.js, Next.js, PostgreSQL, Nginx, Git, CI/CD*

- Built and maintained 10-15 REST API endpoints (JSON) for an internal Task Management System used by 10-50 users: authentication, Kanban CRUD, dashboard, and master data.
- Optimized retrieval of the latest Kanban state, cutting response time from about 2 seconds to milliseconds in the tested implementation.
- Contributed to the backend of an ERP invoicing module.
- Supported staging and production deployments and resolved deployment issues within the same working day.

## TECHNICAL SKILLS

**Core:** PHP, Laravel, JavaScript / TypeScript, SQL, REST API / JSON

**Frontend:** React.js, Next.js, Vue.js, Angular, Ionic, HTML & CSS, Responsive Web Design

**Backend & Database:** Node.js, PostgreSQL, MySQL / MariaDB, SQL Server, Supabase

**Infrastructure / Tools:** Git, Redis, S3, SFTP, Nginx, CI/CD, Sentry, Linux

## EDUCATION

**University of Siber Asia** Jan 2025 - Present

Bachelor's Degree (S1) in Information System - Currently Enrolled

**Wikrama Vocational High School** Jul 2020 - May 2023

Software Engineering

## CERTIFICATIONS & AWARDS

- BNSP - Software Engineering
- Certiport - IT Specialist
- Employee of the Month, Alturian - August 2024 and January 2025
- Certificate of Internship - PT Immobi Solusi Prima

## LANGUAGES

Indonesian - C1 Advanced | English - B1 Intermediate
